

Biochemistry Vocabulary Words

Protein

nucleotide

Amino acid

denaturation

Hydrolysis

catalyst

Dehydration synthesis

reaction rate

Steroids

phospholipids

Monomer

Adenosine triphosphate

Polymer

activation energy

Glycogen

peptide bond

Glucose

nucleotide

Cellulose

fatty acid

Starch

saccharide

Carbohydrate

organic compound

Macromolecule

alcohol

Enzyme

Active site

Competitive inhibitor

Substrate

Reactant

Product

Non-competitive inhibitor

Lipid

Nucleic acid

Saturated fat

Unsaturated fat
